## OLIVE LEAVES

### **Antioxidant:**

Polyphenols are free radicals scavengers; free radicals damage healthy cells and cause advanced aging, cardiovascular problems and degenerative diseases.

### **Blood pressure reduction:**

Oleuropein favorably modulates arterial resistance or stiffness. The drop in blood pressure is accompanied by the widening of blood vessels that results in improved blood flow.

### **Immune Booster:**

Olive leaves have antiviral properties, they can provide full cover against the major viruses (including herpes).

## CALENDULA

### **Antinflammatory:**

Calendula is usually used to reduce pain and swelling (inflammation) and to treat ulcers, hemorrhoids, peeling lips, etc.
